

Creating a holistic financial plan can be far reaching. Financial decisions don't happen in silos - each will have an implication for other areas. *Eg. investment trades can impact your tax situation, or your insurance and retirement decisions could impact your estate plan.*

As such, it is important for us, as your advisor, to gather as much information as we can, in order to create a comprehensive plan. **Don't stress if you have trouble gathering some of this information,** we will work around it.
